

# Bottle Size Guide

Print this page, cut out your label size, and take it with you when you're shopping. Lay it over the bottle (or candle, or other item!) you intend to use. If it lays flat, your label will fit!

If it wrinkles around the curves of the bottle, your label will be prone to wrinkles and air bubbles. Choose a bottle with a straight flat surface that is taller than your label.

*When printing, make sure the scale is set to "Actual Size" or 100% so the measurements are true to size.*

## Full Champagne

**ALSO RECOMMENDED FOR:**  
some wine bottles

**5" X 3"**

## Candles
